Dear Parent/Carer,

3-in-1 Teenage booster and MenACWY Vaccinations

A part of the UK routine Childhood Immunisation Schedule, we are offering the 3-in-1 teenage booster and MenACWY vaccines to your child. The 3-in-1 teenage booster protects against three different diseases – Diphtheria, Tetanus and Polio. The MenACWY protects against Meningococcal A, C, W & Y.

Why is it important to protect your children from these diseases?

Diphtheria – is a life-threatening disease where poisons produced by the bacteria entering the blood stream can damage the heart and other organs.

Tetanus – is a disease that tends to be caused by an infected wound and can be fatal.

Polio – can result in severe paralysis and can be fatal.

Meningitis – can affect all age groups, which can cause two very serious illnesses, meningitis, and septicaemia.

Leaflets explaining these vaccinations are provided. **Please discuss these with your child.** Barnsley School Aged Immunisation Team will be visiting **Outwood Academy Shafton** on **6th and 20th March** to administer these vaccines. Please visit www.barnsleysais.co.uk and fill in the consent form using school code **BN139211**, even if you do not want your child to be protected from these diseases.

If you have any queries, please contact Barnsley SAIS on barnsleysais@swyt.nhs.uk or call us on 01226 644233 / 644234.

Yours sincerely

Barnsley School Aged Immunisation Service
