

5 Steps To Successful Live Learning

RECAP
& RECALL

Your teacher may include some Recap and Recall activities to improve your recall of previous learning. Make sure you have caught up on any lost learning in Google Classroom.

CLARITY OF
LEARNING
INTENTIONS

Listen carefully to what the learning focus of the lesson is. If you are making notes on paper, write down any key learning points throughout the lesson.

NEW
INFORMATION

When the teacher is giving instructions about the tasks, make sure you are listening carefully. If you don't understand then press the 'raise hand' button or send any questions in the chat.

PRACTICE

Your teacher may allow you to work independently when completing practice tasks. Please follow instructions given and ensure you know how to ask for help if needed.

FEEDBACK

Feedback will be built into every lesson. This could be whole class or more personalised feedback. This is an opportunity to check your understanding. Use this to focus on areas of learning you need to improve.

**FIVE ELEMENTS
OF LEARNING**
